

## RentWorks Version 4.1.e Release Letter

Note: Release 4.1+ requires Progress Version 11.3+

## Significant changes:

• Storing credit card numbers in the database. Starting with release 4.1E Bluebird is supporting Chip & PIN processing via Vantiv with a token being stored in the database instead of the card number. To minimize risk of identity theft we've decided to neither store nor process sensitive credit card data in RentWorks. Those of you using Bluebird's credit card processing module with an interface to Element using the old swipe machines will see no change until you upgrade to Chip & PIN processing using TriPOS.

New customers will be directed to use the new TriPOS interface supporting Chip & PIN.

Customers with no credit card interface via RentWorks will for now be able to process as before by setting up a dummy credit card control record for each location.

• **NEW DASHBOARD** – An alternative dashboard which uses the Cyberquery toolset can be configured and installed:

- New Document Feature Any type of file can be stored and associated with a vehicle or rental agreement. This is accomplished by accessing the new toolbar icon from Contract Processing or Vehicle Fleet.
- **New Voucher Enhancement** This provides the capability to enter vouchers into RentWorks and then have the counter agent honor contracts using the voucher. The voucher specifies rate, duration and expiration date. The contract is validated to make sure that it meets the requirements of the voucher.
- **Contract modify lookup by voucher number** To support the voucher enhancement above, you can now lookup contracts by a voucher number.
- **Age restriction by local company** There is now the ability to apply age restrictions for a local company. These override the settings by location and class.
- New maintenance type RECALL In the US, a federal law was passed to protect consumers from rental vehicles under recall. Effective July 1, 2016, rental car companies must GROUND vehicles that have been recalled until maintenance services have been performed. Therefore, a new maintenance schedule called

"Mandatory OEM Recall" and a grounding status of "OEM Grounding Recall" were added to RentWorks to address this situation.

In RentWorks, you create a maintenance procedure (you can choose your own name for this procedure) and assign the schedule of "Mandatory OEM Recall" to it. As you receive mandatory OEM recall notices, you simply assign this procedure to those vehicles in your fleet. If the vehicle is available, the vehicle will be grounded immediately. If the unit is on-rent, it will be grounded upon return. In either case, once the vehicle is grounded with the "OEM Grounding Recall" status, the unit will NOT be able to be rented until a repair order has been successfully completed for the safety recall. This enhancement also allows for multiple Grounding statuses, such as "Ground for Sale".

- **Rewrite of JumpDrive interface** New and improved features of JumpDrive required a rewrite of the interface.
- Rewrite Reynolds interface to use web services Reynolds has phased out their OLE interface in favor of a web services interface.
- Rewrite LightYear/DealerBuilt interface to use web services LightYear has transitioned to a web services interface. We have accommodated this change. This will be a customer data interface only. The Accounting API has not yet been released by LightYear/DealerBuilt.
- New XTime web services repair order reservations Xtime provides dealerships with the ability to schedule maintenance appointments. This new interface creates a reservation in RentWorks if a service loaner vehicle was requested.
- Provide a "Hosted Solution" for Credit Card Processing when a Chip and Pin device is not available We have created an interface to the Element Web Service to be able to do secure credit card transactions when a chip and pin device is not available.

## Descriptions of SARS addressed, in order of impact then program name:

Program	SAR	Brief Description
Level 1		
CCPRO	10180	Provide a hosted solution for CC processing. Reduce the exposure of CC numbers on the screen. Improve CC processing for EMV.
Counter	9990	New Voucher Enhancement.
Counter	9991	Add the ability to apply an age restriction by local company.
Counter	9998	Allow contract modify by voucher number.
Counter	10030	Recall enhancement.
Counter	10033	Attach Documents enhancement.
Counter	10087	Customer would like to have multiple Grounding statuses.
Maintenance	10056	Add a new maintenance type of RECALL for new NTSB mandate.

Interfaces	9731	Rewrite JumpDrive interface to use getCurrentDetails method vs.
		getArrivals.
Interfaces	9823	Rewrite Reynolds ERA interface to use new web services.
Interfaces	9938	Create web service for XTime to send repair order reservations.
Interfaces	9980	Rewrite the LightYear interface for Web Services.
Level 2		
2000.2		
CCPRO	10142	Add field to CC control record that, when checked, converts all authorization attempts to paid deposits.
CCPRO	10163	Create an interface to Element's hosted payments solution.
Counter	7481	Assign proper report location when using an authorization from another location.
Counter	9427	Add the "Reasons for Rental" field to the Loaner Rental entry process.
Counter	9826	Add the Reference number field to the Loaner Entry screen.
Counter	10004	"A deposit amount of \$0.00 is required." message when balance is 0.00.
Counter	10092	Do not allow users to change the location out code on reservations or contracts that have an Element or triPOS auth or payment on them.
Counter	10171	Add ability to lookup rates form RezPower and pull into Reservation/Contract.
Erez	10074	Add prompt to Erez web page to select a supported currency. Display values in the selected currency.
Hertz	Various	Many corrections, updates and improvements to the Hertz Interface.
Interfaces	9980	Convert existing LightYear customer search and insert routines to handle LY's updated web services.
Maintenance	9758	Need to have access to the deductible and limit fields for coverages for type SLI.
RezPro	9809	Economy reservation link via XML.
RezPro	9814	Payless reservation file will be using Budget layout.
RezPro	9968	Create Alamo (ala1) reservation link.
Level 3		
API	9985	Allow 30+ day reservations in the API. Requires CF E1004.
API	10007	Allow Element CC process from the OTA API.
API	10068	Payment records are created as "authorizations" - should be "paid".
CCPRO	10096	During Element authorizations, change the TID setting to fix the mismatching of TID to MID regardless of term defaults, report location or payment rule manipulation.

CCPRO	10134	Add a function to get a token at any time for a given CC. This will provide a way to get it if the initial request fails.
CCPRO	10151	If using triPOS, disable Paid/Auth field when editing a Paid Deposit.
Claims	8420	When "Create Merge File" is selected from the Form Letter Tab of the Claims management program, the export file column alignment is off by two columns.
Claims	9936	Send an email when a new claim record is saved.
Claims	9936	Claims update to send email when New Claim added.
Counter	6910	R/O on RezPlanner.
Counter	8625	Prevent the cloning of a closed contract with a company that is on credit hold.
Counter	8928	Cannot remove damage from a vehicle during contracts.
Counter	9442	The # of extended days changes to zero during extension entry.
Counter	9604	Display future dated R/O correctly.
Counter	9686	Cannot secure the CREATE button in Company lookup from Repair Order and Insurance Extension screens.
Counter	9807	Allow printing from the reservation browser.
Counter	9816	Don't allow DB billing to Renter when the customer name length exceeds 30 characters.
Counter	9843	Cannot secure the DELETE button in the notes popup window.
Counter	9862	Coupon for 1 day on a 1 day rental still charges for 1 day.
Counter	9876	When honoring a reservation, the check-out and check-in (due back) times should match.
Counter	9882	Add the odometer of the renter's vehicle to the insurance replacement tab.
Counter	9921	When a renter who works for a company that is on credit hold is added to the contract/reservation, you do not receive a Credit Hold message.
Counter	9994	When entering a task in the Daily Planner there is no default location code.
Counter	10021	Add search by voucher number. Change RadioSet to ComboBox and color tour/loaner reservations blue.
Counter	10156	You cannot remove the "printable" flag on Corporate reservation notes.
Counter	10186	Counter vehicle lookup: Add the vehicle description to the contract vehicle.
Counter	10191	Allow 20 characters for check # in payments.
Erez	9958	Allow Erez reservation longer than 30 days when CF E1004 is active.
Erez	9964	Allow Erez Mobile reservation longer than 30 days when CF E1004 is active.
Inquiries	7896	Do not allow system tasks to be canceled by users.
Inquiries	8059	Prevent users from attempting to see or email reports run by other users in report inquiry.
Inquiries	10046	Allow the use of wildcard characters in license number for the date/time/license inquiry.
